Shaping AI processes for the wellbeing of society and workplace

CALL talks webinar **Wednesday, 4th November 2026 16:30 - 18: 00 hrs** (Brussels time)

The European Union AI act is an answer to the huge changes AI has brought to workplaces as well as to society.

Our webinar gives you a chance to update yourself on current achievements and new challenges, occurring almost weekly during the last months.

Speakers will be **Irina Orssich**, from the European Commission, in charge of AI Act Governance and Regulatory Policy and

Jan Penfrat, Senior Policy Advisor at EDRI (European Digital Rights) a civil society organisation, also

Rev. **Frank-Dieter Fischbach**, General Secretary of the Conference of European Churches will give an introduction.

After the presentations, a question and answer session with the speakers will be moderated by the CALL - team.

This meeting will be followed by a number of webinars in 2027, working towards a conference later in the year.

The next webinars will focus on AI energy consumption, changes in social relations, and other issues raised by the new technology.

In order to participate, please register via our website:
